PERIODICALS ABSTRACTED

This is a list of the journals from which during this past year we have abstracted articles of ecumenical import, or in which we have searched for such articles. The list is intended to give an idea of the extent of our coverage, although, despite the diligence of students and scholars in many countries, we have not always been able to find and include every single such article. For this reason we ask for information concerning any journals and issues which include significant ecumenical materials, so that we may be of better service to those who wish a survey of the existing situation in countries and areas of the world. It is possible in this way to observe trends and to gain knowledge of specific factuality.
